200 E 89th St, Apt 19E, New York, NY 10128

Education

Emory University, Class of 2023: Neuroscience (B.S.) with High Honors; GPA 3.95 **Atlanta, GA**
SUNY Downstate College of Medicine, Class of 2028 **Brooklyn, NY**

Notable Skills

Coding - experience coding in Zsh, Python, MATLAB, R, Swift (iOS), and HTML. Most proficient in Zsh and Python automation and database scraping. Also experienced in automating the organization and management of datasets, creating optimized workflows, scraping databases using Selenium, parallel processing, and error handling to ensure data integrity.
Research - experience conducting behavioral, animal, computational neuroscience (undergraduate) and clinical data (post-graduate) research for over ten years; extensive experience writing papers, familiar with the process of attending lab meetings, meeting deadlines, creating presentations, abstracts, and manuscripts.

Urologic and Surgical Research

DS4HP - Fall 2025 - Present - Lead investigator on retrospective outcomes study evaluating surgical utilization, access inequality (PAI), and market concentration (HHI) using ICD-10-PCS mapping and multivariable regression (Stata). Manuscript in preparation.
MSRE - Summer 2024 - analyzed adverse event profiles of SynchroSeal and Vessel Sealer Extend devices used in robotic surgery to seal blood vessels at Maimonides Medical Center. Presented at Society of Urologic Robotic Surgeons Focal Therapy, and regional surgical conferences.
MMC Research Associate - Summer 2026 - present - worked as research associate for the Urology and Urogynecology departments of Maimonides Medical Center.

Other Research

Emory Autism Center Research - Spring 2021-Spring 2023 - Examined differences in functional connectivity using MRI between the anterior insula and two neural networks in autistic people (salience and ventral attention networks). Correlated atypicality with symptom presence and severity. Defended and wrote a 50+ page honors thesis; presented at symposiums.
Epilepsy Research - Summer 2017 - Spring 2019 - Ran experiments independently using genetically modified mice to study myeloid cell activation and its impact on status epilepticus using PCR and gene expression analysis. Also studied TBI, PTE, among other things in epilepsy. Presented my work at symposiums numerous times and received distinction.

Conferences and Publications

Edwards C, Blair HM, Silver, D. In-Field Recurrence and Out-of-Field Progression Following Irreversible Electroporation for Localized Prostate Cancer. Presented at Society of Urologic Robotic Surgeons Focal Therapy Conference, 2026.
Edwards C, Blair HM, Silver, D. Exploring PSA Reduction After IRE Treatment in Prostate Cancer. Presented at Society of Urologic Robotic Surgeons Focal Therapy Conference, 2026.
Carroll A, Blair HM. Concordance of Prostate Cancer Clinical Trials and Disease Incidence in the United States, 2025. AUA.
Blair HM, et al. Adverse event profiles of SynchroSeal and Vessel Sealer Extend in robotic urologic surgery. Presented at Society of Urologic Robotic Surgeons Focal Therapy Conference, 2024.
Blair HM. Functional connectivity of anterior insula in autism. Honors Thesis, Emory University, 2023. Presented at Emory University Conference for Neurological Honor's Theses, 2023.

Service and Leadership

Students with Disabilities and Chronic Illness at Downstate - Spring 2024 - Present - Secretary - Coordinate executive operations and external partnerships for student disability advocacy organization;

Henry McLean Blair

henry.blair@downstate.edu • (914) 708-9909

200 E 89th St, Apt 19E, New York, NY 10128

Peer Wellness Mentor - Fall 2024 - Present - chosen to be a mentor for incoming MS1s, helping students acclimate to medical school, meeting throughout the year and answering questions about unit material, studying, research, matching into residencies, mental health, etc.

SUNY Downstate COM Applicant Interviewer - Spring 2024 - Present - conduct interviews for incoming medical class.

Brooklyn Free Clinic - Spring 2024 - Present - Volunteer at a student-led free health clinic; performing patient intakes, physical exams, and presenting differential diagnoses and proposed treatment plan to attending physicians.

Winship Cancer Institute - Spring 2022 - Spring 2023 - clinical lab runner and and performed intakes at this cancer.

EduEmory - Fall 2020-Spring 2023 - President and Founder - Established education equity nonprofit; led recruitment, programming, fundraising, and external partnerships;

Emory Autism Advocacy Organization (AAO) - Fall 2019-Spring 2023 - President - Led legislative advocacy efforts and campus inclusion initiatives; recognized at international leadership conference;

B+ Foundation - Fall 2019- Spring 2023 - Vice President - coordinated fundraising for families of children w cancer;

Paid Work Experience

ScholarRx Student Advisory Committee - Fall 2024 - present - assisted on the AI development team (as part of my role on the Student Advisory Committee) for ScholarRx, a popular external learning resource for medical students.

Medical School Application Advice/Editor - Summer 2023, Summer 2024 - hired to read the primary applications of medical school applicants, edit secondary applications; advice application logistics, interviewing, and updating schools.

Organic Chemistry and Neurobiology Teacher's Assistant - Fall 2021-Spring 2023 - elected by teachers as one of seven students (out of 400) to receive two As in organic chemistry; held weekly tutoring sessions for students, holistically working through reactions; elected by teachers to notetake a neurobiology course for students with accommodations.

Medical Assistant - Summer 2021 - brought in patients for Dr. Michael Kushner, an orthopedic surgeon in Yonkers, NY. Completed patient intakes, assisted in various procedures (ultrasound-guided HA injections for pain, joint aspirations, etc).

Tutor/Instructor - Private Tutor (Physics, Latin, Chemistry), 2019–Present — Provided individualized academic instruction to high school students.

Extracurriculars

Shadowing - 2021 - Present (intermittent) - Shadowed a urologist, cardiologist, and a pain management neurologist in NY

Presbyterian Church of Mt Kisco - 2015-Present - Member of Summer Mission Teams to Washington, DC.; McDowell County, West Virginia; Baltimore, MD

Hobbies: club lacrosse throughout college; downhill skiing; bike, running, swimming and weight lifting; hiking and backpacking

Music - 2015-Present - Play jazz trombone, ukulele, and piano for fun. Dabble in drums.
